YOU HAVE NEEDS...
WE HAVE SOLUTIONS.

NUDO®

WALL AND CEILING PANELS

Durability • Versatility • Cleanability • Simplicity

NUDO®

Founded in 1954, Nudo operates in four business segments: Building Products, Signage, Transportation Products and OEM supplies. Our building products sector consists of ceiling, wall, floor and exterior architectural panels. Over the years, we have grown to become one of the largest laminators in the United States. Our experience and commitment to quality contribute to our leadership position in producing panels with a variety of substrates such as plywood, oriented strand board (OSB), gypsum, composites and finishes such as aluminum, fiberglass and high-density polyethylene.

With 60 years of experience, we can confidently say that we understand the demands and expectations of the building industry. Our goal is to make things easy for you and that means a simple ordering process, fast turn times, more color options and moldings that are specifically made to match our panels. We stand behind our products and stand firm on 100% customer satisfaction – period!

COLD STORAGE
PROCESSING PLANT

- No minimum quantities
- Ability to custom cut any size of panel
- Broad array of products to meet the demands of the most stringent environments
- Most panels in stock, which allows faster turn times and quicker delivery
- Wide variety of color options
- Moldings specifically made to match our panels

We are happy to assist with any questions you may have. There's no project too big or small and no challenge we can't overcome. Custom panel solutions are our specialty.

FiberLite® FRP

Strength · Durability · Sanitation · Easy Maintenance

FiberLite FRP are fiberglass reinforced plastic panels that are ideal for new or retrofit construction. They install directly to solid wall surfaces or can be used for drop-in ceilings. FiberLite FRP panels are specially engineered to provide durability, easy maintenance and sanitation with exceptional physical and mechanical properties.

COMMERCIAL KITCHEN

FiberLite liner panels provide all you expect from a "Fiberglass Reinforced Panel". These panels are made for interior, moisture resistant environments. They are adhered directly to gypsum or plywood walls with a variety of different trowel-on adhesives. FiberLite is typically purchased in a .090" thickness. A wide selection of sizes, colors, textures and fire ratings are readily available. Competitive pricing and no minimums make FiberLite the choice of distributors from coast to coast.

Features & Benefits

- Durable, shatter resistant surface that resists scratches
- 100% moisture resistant
- USDA and Agriculture Canada certified
- Thermal shock and chemical resistant
- Cleans easily with steam, high pressure sprayers or soap/water
- Extensive color options on textured or smooth surface improves design flexibility
- Class A or Class C fire rating available
- Color-matched moldings and fasteners available for easy installation
- High impact strength
- Low maintenance

Typical Applications

- Kitchens and Food Preparation Areas
- Bathrooms and Hallways
- Food Processing Plants
- Water and Wastewater Treatment Plants

UtiLite™

Durability • Sanitation • Seamless • Easy Installation

The need for a clean environment is met with UtiLite easy to maintain interlocking wall and ceiling panels. The interlocking nature of the panels offers a near seamless appearance. These versatile panels can be installed quickly, both vertically or horizontally, directly to studs or substrate. UtiLite's attractive price point and ease of installation provides cost effective solutions for contractors and installers.

Features & Benefits

- Clean, smooth white surface
- Innovative, corrugated plastic core provides a lightweight, durable panel
- 100% moisture resistant
- Interlocking edge provides a near seamless appearance while reducing installation time
- Class A fire rating
- Meets USDA, FDA and LA County requirements for walls and ceilings
- CIF-ULCS 102.2 – Class A

LABORATORY

Typical Applications

- Food Processing Plants
- Automatic Car Washes
- Dairy Facilities
- Healthcare Facilities

Standard Sizes

16" x 8'	24" x 8'
16" x 10'	24" x 10'
16" x 12'	24" x 12'
16" x 16'	24" x 16'
16" x 20'	24" x 20'

Also Available in Ceiling Tile

2' x 2'   2' x 4'

SecureShield™

Impact Resistant • Easy Installation • Security at the Core of Design

SecureShield is a composite panel that provides minimum to medium levels of wall security, without disrupting the design criteria necessary for your building. It provides superior resistance to penetration from either blunt force or sharp instruments. It installs directly to the structural framing like any standard gypsum panel – no additional products or labor required.

Features & Benefits

- Polycarbonate panel backer provides impact resistance up to 3200 ft. pounds of energy
- Can be customized to meet medium and high security requirements without sacrificing design
- Installs in a fraction of the time required for two step steel mesh products
- Surface finishes and protection can include a full range of patterns and colors
- Fiberglass reinforced plastic facing is available
- Class A fire rating

FiberCorr™

Lightweight • Moisture Resistant • Durability • Scratch Resistant

FiberCorr panels consist of a Fiberglass Reinforced Plastic (FRP) overlay that is factory laminated to a corrugated plastic core. This quality construction provides you with a lightweight panel that doesn't compromise durability. They feature easy installation to studs, ceiling joists, furring strips or solid surfaces. They can also be used as drop in ceiling tiles. The panels can be easily cut with standard hand and power saws.

Features & Benefits

- Textured or smooth panel with a scratch-resistant surface
- Available in white and a wide variety of colors, thicknesses, and sizes
- Resists moisture, stains, odors and chemicals
- USDA, FDA and Agriculture Canada approved
- Will not rot or deteriorate under high moisture conditions
- Not susceptible to termites or other insect damage
- Cleans easily
- Class A or C fire rated surfaces available

Typical Applications

- Water and Waste-Water Treatment Plants
- Marine Facilities
- Food Processing Plants
- Car Washes

BPLite™

Moisture Resistant • Enhanced Durability • Aesthetically Pleasing

BPLite is a High Density Polyethylene (HDPE) liner panel manufactured by Nudo from 100% virgin materials. BPLite panels are ideal for environments requiring moisture resistance without compromising room aesthetics. The panel provides a lower cost solution when compared to FRP. BPLite is readily available in cracked ice white and in a .090" thickness. Other colors, textures and sizes are available upon request. BPLite has a Class C fire rating.

Features & Benefits

- 100% moisture resistant
- Will not rot or deteriorate under high moisture conditions
- Fibrous mat backer improves mechanical bond
- Available in an antimicrobial treatment

Available Colors: Black, Charcoal Gray, Beige, White

Available Textures: Smooth, Cracked Ice, Moroccan, Haircell

Typical Applications

- Animal Confinement Buildings
- Food Preparation Areas
- Service Areas

Standard Sizes

4' x 8'   4' x 10'

RESTROOM

NuPoly®

Durability • Sanitation • Easy Installation

NuPoly panels are a high density polyethylene (HDPE) overlay, factory laminated to various substrates on one or both sides. They install directly to studs, ceilings or floor joists, furring strips or solid walls/floors. NuPoly panels are an economical solution for areas requiring scratch and moisture resistance. Available in a variety of colors, textures and sizes.

Features & Benefits

- Scratch and impact resistant
- Chemical, moisture and fungus resistant
- Cleans easily with steam, high pressure sprayers or soap/water
- Available in smooth or textured and in various thicknesses and colors
- Excellent wearing capabilities for floors or decking in both interior and exterior environments
- Class C fire rating available
- Wide variety of substrates available
- USDA, FDA and Agriculture Canada approved

NuFiber™

Strength · Durability · Sanitation · Easy Maintenance

The NuFiber panel is a durable, fiberglass sheet factory laminated to waferboard or plywood combining the many advantages of wood and fiberglass (FRP). NuFiber is ideal for new construction of walls, ceilings or partitions. They easily install directly to studs, ceiling joists, furring strips or solid surfaces, and some can even be utilized as a drop in ceiling tile.

WINERY

Features & Benefits

- USDA, FDA and Agriculture Canada certified
- Wood substrate for structural strength rigidity
- Resists moisture, stains, odors, chemicals, impact and scratches

ACCESSORIES

Nudo provides the accessory items needed to simplify the installation for any of our panel systems. All moldings are custom extruded to specifically match the panel being used.

- Vinyl and aluminum moldings offered in a variety of profiles
- Adhesives, sealants, rivets, screws and nails
- Mechanical fasteners
- Matching FRP colors, moldings and rivets
